

Connect data from all of your applications, display on customisable dashboards and gain insights that drive business growth.

By integrating all your data sources and visualising key metrics on customisable dashboards, our platform empowers you to make smart decisions, identify trends, and optimise performance across all areas of your organisation.

Connect all your data sources

Comparing data from across all your teams' applications is essential to understanding business performance. With over 30 pre-built data connectors including Salesforce, Hubspot, Google Sheets, Stripe and Slack, you can populate your boards with live data in minutes.

With a Pro account our team will support you to connect a further 50 popular systems including social media, finance, and telephony.

With over 30 standard data connectors including Salesforce, Hubspot, Google Sheets, Stripe and Slack and a further 50 with a Pro account you can populate your boards with live data in minutes.

Choose from over 50 widgets

Visualizing your goals clearly, grouping metrics effectively and displaying data in a consistent manner helps to communicate your objectives. Pick the component that best displays your data and design a board with the simple to use drag and drop editor tool.

Compare your team's performance with a bar chart, see the progress of your projects with a line chart and highlight a KPI with one of the number widgets.

Design a board in minutes with the simple editor tool. Compare your team's performance with a bar chart, see the progress of your projects with a line chart and highlight a KPI with a number widget.

Create boards for all your teams

Your business goals and progress should be clearly communicated to your teams to empower decision making. With no limit on the number of boards you can create you can get all your teams involved.

View your sales performance, see the latest marketing analytics, check the up-to-date finance positions, and keep on track with all your client's projects.

Get all your teams involved. View your sales performance, see the latest marketing analytics, check the up-to-date finance positions, and keep on track with all your client's projects.

Data Sources –

We have core and professional data sources which can be accessed depending on the edition you choose. These data sources allow you to connect applications without the need for complex implementation. Simply select your source from the list and add your credentials to start viewing your data inside Vuuze

Data sources include Salesforce, Stripe, HubSpot, Slack, Shopify, Google Ads, QuickBooks, Zendesk, Twitter, Facebook and LinkedIn.

Component Library –

Display your data and build your boards in any way you wish with a large choice of components. Place on your board in any location with simple to use drag and drop functionality. Resize and customise to get the look you require.

The component library includes bar charts, lines charts, numbers, gauges and tables.

Theme –

Choose a light or dark theme to suit your requirements and the best fit for your company's branding. Switch back and forth as required and share with the team when you have the look you want.

Rest API –

In addition to the start data sources the Enterprise edition has a Rest API allowing you to connect with almost any other system. Our support team will work with you to connect all your systems so you can start gaining insights that help to grow your business.

Onboarding –

Our Professional and Enterprise editions include onboarding, which will help you connect your data sources, design the perfect board and manage access for your team.

Support –

We have Chat, Priority and Dedicated Support packages which are designed to suit a range of complexities. For most the Priority Support of the Professional edition is the best choice but if you need to connect to additional data sources then the Dedicated Support that comes with the Enterprise edition is there to get you set up in no time.
